MODELS
48V & 80V

UP TO
7,000 LB.
CAPACITY

TOYOTA'S 48V AND 80V ELECTRIC PNEUMATIC FORKLIFT

combines power, durability, and ergonomics to deliver a reliable solution that is willing to work hard for you, day in and day out. With a lifting capacity ranging from 3,000-7,000 lbs., this powerhouse is ready and willing to tackle any outdoor challenge. This versatile lift comes with load-sensing power steering, regenerative braking, and AC drive and lift motors to provide you with longer runtimes and a smooth operation so you can get more done quickly and quietly. Overall noise and vibration levels are significantly lower, further reducing operator stress and fatigue. Additionally, neighbors, operators, and customers will appreciate reduced noise levels.

This lift is also designed with a memory tilt steering column that can be adjusted to fit the operator's comfort level. There's no need for readjustment as it will return to its original position after each use for easy access to the battery, further reducing downtime and increasing productivity. When you need raw power to attack any outdoor challenge, look no further than the Toyota 48V and 80V Electric Pneumatic Forklift.

Home & Garden

48V & 80V ELECTRIC PNEUMATIC ADVANTAGES

- ▶ **AC DRIVE & LIFT MOTORS** provide superior performance and energy efficiency as well as reduced maintenance costs due to fewer moving parts
- ▶ **OPERATOR PRESENCE SENSING SYSTEM (OPSS)** encourages the operator to maintain a proper seated position or travel and load handling operations will be limited
- ▶ **DIGITAL MULTIFUNCTION DISPLAY** built-in to the dashboard, including a speedometer, hour meter, battery charge level indicator, parking brake indicator, and onboard diagnostics

- ▶ **WATER RESISTANT** performance designed to handle outdoor applications.

- ▶ **REGENERATIVE BRAKING** returns unused energy to the battery during operation, increasing your runtime

- ▶ **LOAD SENSING POWER STEERING** provides smooth steering response while only operating when the steering wheel moves, keeping more power in the battery

- ▶ **OPTIONAL SLOPE ASSIST** automatically switches power mode to maintain speeds while traveling up a slope

- ▶ **OPTIONAL SEAT BELT INTERLOCK** restricts operation until the operator is properly seated and buckled

AN INVESTMENT THAT PAYS YOU BACK

Toyota demands better for its customers. It's a forklift with better components and meticulously-planned integrated systems that work together to deliver intuitive, dependable performance day after day. Toyota forklifts don't often require service. But when they do, it's fast and easy — by design. And legendary Toyota quality means more productivity over the lifecycle of your forklift, along with lower repair costs.

IN IT FOR THE LONG HAUL

The Toyota 48V and 80V Electric Pneumatic Forklift does more than carry its weight. It goes the distance. It's not uncommon for Toyota forklift owners to reach 10 years of use, as long as the forklift is properly maintained. Best of all, it's a Toyota — the most dependable and reliable line of forklifts you can buy. Welcome to the forklift designed to pass any test. Including the test of time.

SAS

SYSTEM OF ACTIVE
STABILITY

STABILITY IN ACTION

Toyota's System of Active Stability™ springs into action when operators encounter unanticipated load and speed conditions.

Active Control Rear Stabilizer senses potentially dangerous turn speeds and widens the forklift's center of gravity to decrease the likelihood of a lateral tip-over.

Active Mast Control automatically limits operator actions in certain circumstances that could cause the forklift to tip forward or backward. Forward and rear tilt control monitors load weight and mast height, then acts to limit forward or rearward tilt in potentially unstable situations. This reduces the chances of spilling unsecured loads and increases forklift stability.

"I'M HERE TO MAKE SURE YOUR FORKLIFTS DON'T TAKE VACATION DAYS."
